

**ADVICE NOTICE
REGARDING GARBAGE GRINDERS**

Title 5 Regulations require that the installation and usage of garbage grinders should only be utilized with septic system that is specifically designed to accommodate this. This requirement is due to the fact that a garbage grinder introduces large amounts of solids to your system which can cause permanent damage to the soil absorption system (SAS). Adding food wastes or other solids reduces your system's capacity. Typically the capacity of traditional SAS are not sized or designed accordingly to support the use of a garbage disposal.
